Quick statistics 2 years after the last review See Gallery5 ImagesAdded routines and habits are sworn enemies of the brain. Doing the same path to work or always focusing on the same daily practices can cause aging neurons that are not stimulated enough to maintain activity. Once it was good advice to make crosswords, today your smartphone can think about it. As Reported by The Guardian, the first application that ran in this field was Dr. Kawashima's Brain Training, which, through mini-games and performance charts, kept his mind in training for the Nintendo DS. Many years later, apps to keep the brain in shape still retain the same patterns while improving graphics and sophistication. We chose 5.Elevate. One of the best apps when it comes to transparency and simplicity of content. There are over 30 games and quizzes to support train memory, concentration, logic and understanding with the ability to view records with daily progress and progress. The further you go, the more difficulty increases, although at some point you have to spend 3.99 euros to have a Pro package that unlocks new features for you. Mr Lumosity. Lumosity was created by neurologists to train memory, attention and other faculties. Based on neuroplasticity studies, Lumosity games are used for research, and have been incorporated into studies conducted by leading scientists around the world. To have a full training program you have to pay 11.99 euros, but the free version still allows you to have good results. Fit Brains Trainer. It ranks first among educational applications in more than 90 countries, with over 18 million users. It's one of the most versatile apps with over 50 fun games and 500 training sessions and detailed performance reports and is the only one that can stimulate IQ and QE (cognitive and emotional intelligence). To have all the games available you need to spend 5.99 euros. Mr Wordbrain. This app is completely free, doesn't give you daily or weekly reports, but it's the funniest. This is a very similar game to Bookworm, in which you need to compose the words in the photo: the more schemes solve the higher you climb to the world ranking. This is one of the most downloaded from the App Store.Cognito. Another app that looks more on the gaming side than on the statistical side. There are games for memory training, logic and understanding that you update your profile by improving your skills. It can sync with health to draw data from physical training and sleep quality to assess the consequences – good or bad – mentally. Looking for a mind training app? You're in the right place. To keep your mind always active, you need to perform targeted exercises. Until a few years ago so many of us trained our minds with rebus-like games or crosswords. Surely you too have bought a copy of the famous magazine Week of Puzzles or you will enjoy doing a crossword puzzle in gossip magazines. Today, the increasing use of smartphones allows us to stimulate our mind through applications. For a student to train memory and exercise the mind is fundamental. Since you are certainly in possession of a smartphone too, here is a gift from Niccolò Cusano Online University of Viterbo. Our editors have prepared for you a guide to 5 applications to train your mind to know absolutely. If you're curious to find out what they are, keep on reading! Mind Training Apps: Which you can download Practice your mind with exercises in memory, concentration and logic is important for those who, like you, face periods of intense study. If you are looking for memory games useful in the studio and able to get to a quick solution to everyday headaches, here are 5 apps to download on your phone: LumosityElevateWordbrainFit Brains TrainCognito We are going all right and analyze one app at a time. Lumosity Lumosity is a free and paid application dedicated to improving mental health and performance. Created by neurologists for memory training, Lumosity contains fun games that test your intellect. The basic idea of this application developed in collaboration with prestigious U.S. universities and health institutions is to provide mental exercises that can improve cognitive abilities. All with a fun component and extreme ease of use. After downloading the app, a mental training card of 30 games is assigned. At the end of the training session, Lumosity will assign you a personal workout with daily game sessions to improve specific cognitive areas. Completing each session will allow you to update your overall brain performance index. This will allow you to monitor performance improvements. As you can see Lumosity is a real mental fitness app. Elevate Lumosity's rival app is Elevate, one of the best apps when it comes to clarity and simplicity of content. Elevate has a clear and intuitive graphical interface. Inside Mini games that can test your cognitive skills and ingenuity. Over 30 games and quizzes to face and beat to train memory, concentration, logic and understanding. Elevate also gives you the ability to monitor daily changes and progress and view records. To unlock new features, you need to switch to the PRO version for €3.99. The free version has a limited set of features, while the paid version is much richer and more complete. In general, Elevate offers language and mathematics exercises, capable of training reading, computation and comprehensible skills. Fit Brains Trainer Another mind training app is the famous Fit Brains Trainer, with over 18 million users. Of all the apps, this is the most complete of over 50 games and 500 training sessions. The paid version allows you to have all the games available at the price of 5.99 euros. Each training session will provide you with a detailed description of your performance by capacity. Brain Trainer lets you understand your weaknesses. Fit Brains Trainer is the only mind training app that stimulates IQ and QE, i.e. cognitive and emotional intelligence. The training program, designed by Dr. Paul Nussbaum, an American clinical neuropsychologist, has gained recognition as the best teaching application in more than 80 countries. Wordbrain If you want a fun and completely free app, you can download Wordbrain. This app does not provide reports, and the game consists of finding hidden words. This is the perfect app for the word genes. The game is very easy at the beginning, but then, as you solve the patterns, the difficulty level increases. One of the most downloaded free games for iOS and Android devices, created by the developers of the popular Ruzzle app. The goal is to compose a certain number of words with assigned letters and climb the world ranking, level by level. Peak Last to Peak memory training app. With 30 different games, Peak works by memory, language and mental abilities. The application is available both in the free version with a basic offer and subscription at the price of 3.99 euros per month, with the possibility of customization, access to statistics and other features. The application was developed in cooperation with experts in the field of neurology, cognitive sciences and education. In 2014, Peak was awarded by Apple as part of The Best of 2014 in 24 countries. Have you already selected the mind training app you want to install on your smartphone? If you're looking for other tips for training memory, also read how to improve your concentration and learning memory. Studio.
